Instructor: Dr. S. Ganapathy
Office: 132 Fronczak Hall; Phone: (716) 645-2906
Email: sg82@buffalo.edu (use PHY107 as the Subject of the email)

TA: S. Muralidharan (Email: sm393@buffalo.edu, use PHY107 as the Subject of the email)

IMPORTANT: Course materials will become available around Christmas. You are encouraged to start early, effectively extending the length of the winter session.

Course Format
Online lectures, homework, recitation and office hours, and proctored exams (not necessarily at UB, see below for details). The course does not require you to be on campus.

Textbook

Communication
All emails should have PHY107 as the Subject. Otherwise they will not be answered.

UBlearns website ([https://ublearns.buffalo.edu/](https://ublearns.buffalo.edu/)) will serve as the main source for all course related contents. Because this is an online course, paying attention to on-line announcements, at UBlearns and/or by email, is critical.

Homework problems will not be discussed via email, because it is not effective and both your questions and our answers can be confusing in a text form. Use office hours instead.

Lectures
Lectures will be in the form of video-taped lectures, which you can view at your own time. Instruction for viewing the lectures will be given to you before class starts.

Recitation
There will be online recitation every week and the schedule will be posted in UBlearns.
You will be given instructions concerning how to login to the website for online recitations.

Office Hours
Office Hours will also be conducted online and the schedule will be posted in UBlearns.

Laboratory
Laboratory is a separate course, PHY 158, which you can take it in another semester if you are in Buffalo. You do not have to take it for the purpose of this course, but it may be required by your program. If you attend another university, you can take it at your university. If your university does not offer the lab as a separate course, find a university/college near you that does.

Homework
The homework in PHY 107 is computer based and uses the WileyPLUS system. This system is based on problems at the end of each chapter in the textbook. The students can purchase the WileyPLUS package with the textbook or separately if you already have the textbook. The WileyPLUS package contains the access code for each student as well as instructions on how to enroll.
Instruction for purchasing the code and registration can be found at http://catalog.wileyplus.com/resources-and-support/students/register.html. The login link will be provided in UBlearns. You will be allowed three attempts on each problem. The system will let you know whether you got the correct answer or not. If you have difficulty with a particular problem you are strongly encouraged to attend the office hours and get help so that you can attempt to submit your solution again. Each assignment has a due time and date. **No time extension will be given.** To avoid unexpected emergencies, please use the week before the due time to submit it.

**Examinations**

Exams will be offered at UB campus or you can also make arrangement with testing centers at a university/college campus near you to minimize driving. Most off-campus testing centers charge a fee for taking the exam there. Instructions for picking a location can be found at the end of this syllabus. If you intend to take the exams at a location other than UB, you will be responsible for making arrangements with the center to take the exam at the same time it is offered at UB. **Please inform the TA by Jan 7th for approval**, because not all testing centers are considered acceptable. Also it takes time for us to coordinate with the testing centers, including sending them the exams. Because of the number of campuses involved, **there will be no makeup exams.** Make sure to give yourself sufficient time to arrive on time, especially if you have not been there before, so that you will have the full scheduled times for the exams. A scouting trip ahead of time is recommended.

- Mid-term Exam  
  Friday, Jan 12th, 1:00 pm—3:00 pm (EST)
- Final Exam  
  Wednesday, Jan 24th, 1:00 pm—3:00 pm (EST)

Exams will consist of multiple choice questions. All exams are strictly closed-book. You can, however, bring **ONE formula sheet (two-sided, 8.5x11 inches)** with you. Other than calculators, no electronic devices are allowed. Cell-phones have to be switched off. In order for the exam to be accepted you must present a **valid Student ID Card (Driver’s License if you are not a UB student)** at the time of the exam.

**Grading**

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Midterm Exam</td>
<td>35%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>45%</td>
</tr>
<tr>
<td>Homework (WileyPlus)</td>
<td>20%</td>
</tr>
</tbody>
</table>

An **Incomplete** grade can only be requested by students who are at **passing level before the final exam** and are unable to finish the course with legitimate reasons. **No request will be accepted after the final exam.**

**Statement on Academic Integrity**

Academic integrity is a core value underlying all scholarly activity at UB. You should familiarize yourself with the Undergraduate School's academic integrity policy (see http://undergrad-catalog.buffalo.edu/0203/undergraduateeducation/strights.shtml). In particular,
please note that giving or receiving aid on an exam or any act of academic dishonesty is cause for an F for the course and dismissal from the University.

**Students with Disabilities**

If you have a disability of any kind that would require special accommodations, please contact the Office of the Accessibility Resources at 25 Capen Hall.

**Suggestions**

The goal of this course is to understand and apply the laws of physics to solve practical problems. Here are some suggestions that may help you attain this goal:

- Be on time with everything—the single most important item for doing well in this course.
- Solve the homework problems independently, without help or the book, at least once, even if it is after you discussed the problems with instructors or other students.
- If you have a problem with any aspect of the course, seek help from the instructors/TA no later than the first exam. The earlier, the better. There are usually no good options when it gets close to the time of the final exam.

### Course Schedule:

<table>
<thead>
<tr>
<th>Homework</th>
<th>Due Date and Time</th>

<td></td>
</tr>
</tbody>
</table>

### Exam Locations

Many universities and colleges have testing centers which allow you to take tests with a moderate fee. Listed here are instructions for what you should do in picking exam locations. **Schools are listed only as a reference, with some information when available, which may not be up to date.**
