### Specialization Courses: 9 credits

Specialty electives provide a body of course work that will prepare a student for a defined area within the field of environmental sustainability. We call this “your jam”, and the electives you choose from below will develop this speciality. This is the pre-approved list but we will accept petitions in advance for individualized coursework within your chosen focus area. Please see the Environmental Studies Advisors for further information.

EVS300 Half-time Special Topics
